The International Titanic Lebanese Committee

A tribute to the Lebanese on Board of the Titanic

- Introduction

In our quest to pay tribute to Lebanese Emigration and to the perils and risks undertaken . A group of Lebanese researchers from Lebanon and abroad have gathered to document, identify and recognise the Lebanese on Board of the Titanic.

- Background

Many factors contributed to the oblivion that shrouded the Lebanese on board of the Titanic .The obscure passengers manifesto , the advent of World War I are perhaps the most important reasons . Since then many events superseded that disaster that hit the passengers of the ship in 1912 but neither the reasons nor the perils that are associated to emigration have perished.

- The Committee

The members of the Committee found in their commitment to emigration issues in their respective academic or diaphora roles a passion for addressing that oblivion and launched a Committee to seek a global campaign to document and to reveal those who till date remain unidentified and to join the many nations in honouring those who preceded us on those long roads away from home .
